

VentureLens — Payment & Revenue Evidence

As of: 2026-07-07T12:36:41+00:00 (source: production GET /api/v1/impact.json)

Arms-length
\$2,887

Related-party
\$0

Paying customers (arms-length)
13

Disclosure: these figures are from Stripe **test-mode** checkouts, demonstrating the full checkout → webhook fulfillment → arms-length/related-party revenue classification flow end-to-end in production. Live (non-test) billing is in progress; real customer payments will supersede this evidence once processed. This is not being presented as verified real-world earned revenue.

Itemized charge ledger pending: the per-charge table below is illustrative from an earlier snapshot (2026-06-11) and predates a mid-June production data reset — it does not reconstruct all 13 current charges. Run `php scripts/export-revenue-evidence.php` against the production database for the authoritative, current itemized ledger before final Devpost submission.

Date	Organization	Plan	Amount	Type
2026-06-10	BINA	cohort	\$199.00	related party
2026-06-10	Pacific Innovation Lab	cohort	\$199.00	arms length
2026-06-10	grandsolo	starter	\$299.00	arms length
2026-06-11	Pacific Innovation Lab	cohort	\$199.00	arms length

Arms-length vs related-party per RevenueClassifier (email domain + org slug). Cross-check with Stripe Dashboard and /billing in the app. Sample table above is illustrative only (superseded by the 2026-07-07 aggregate above) — regenerate before final submit.
